Yes. I will add the people identified below.

What time do you anticipate being wheels up and acquiring data along the new flight paths?

Just talked with the crew. They are about 50 minutes out from Grand Junction. Should be on the ground a bit after 1000 (mountain). Expect a 1.5 hour delay while calibrating on the pads. Anticipate 1330 arrival in Santa Fe.

Greg/Eric,

Can we get rights to your website for thomas.markj@epa.gov, curry.timothy@epa.gov, kudarauskas.paul@epa.gov, and cardarelli.john@epa.gov. In regards to the chatter on data posting, I assume we will use your website?

Mark
